REPORT OF TRAFFIC COLLISION INVOLVING AN AUTONOMOUS VEHICLE

Instructions: Please print within the spaces and boxes on this form. If you need to provide additional information on a separate piece of paper(s) or you include a copy of any law enforcement agency report, please check the box to indicate "Additional Information Attached."

- Write **unk (for unknown)** or **none** in any space or box when you do not have the information on the other party involved.
- Give insurance information that is complete and which correctly and *fully* identifies the **company** that issued the insurance policy or surety bond, or whether there is a certificate of self-insurance.
- Place the National Association of Insurance Commissioners (NAIC) number for your Insurance or Surety Company in the boxes provided. The NAIC number should be located on the proof of insurance provided by you company or you can contact your insurer for that information.
- Identify any person involved in the accident (driver, passenger, bicyclist, pedestrian, etc) that you saw was injured or complained of bodily injury or know to be deceased.
- Record in the PROPERTY DAMAGE line any damage to telephone poles, fences, street signs, guard post, trees, livestock, dogs, buildings, parked vehicles, etc., including a description of the damage.
- Once you have completed this report, please mail to: Department of Motor Vehicles, Autonomous Vehicles Branch, 2415 1st Avenue, MS D405, Sacramento, CA 95818

STREET ADDRESS | CITY | STATE | ZIP CODE

☐ **Additional information attached.**

SECTION 5 — ACCIDENT DETAILS - DESCRIPTION

☐ Autonomous Mode ☒ Conventional Mode

On Wednesday, May 22, 2024 at approximately 3:45pm PST, a Nuro Prius operating in manual mode bumped a pedestrian at the intersection of Webster Street and Middlefield Road in Palo Alto, California.

The Nuro Prius was in autonomous mode when it approached the intersection and came to a stop at the stop bar on Webster Street. It is a two-way stop with the traffic on Middlefield having right of way. The Nuro Prius nudged forward due to an occlusion.The Nuro operator judged the nudging to be too far and disengaged autonomous mode to reverse in manual. When reversing, the operator bumped a pedestrian crossing the street behind the Nuro Prius.

The pedestrian was not injured and after speaking with the operator, left the scene without providing additional information. There was no damage to the vehicle and law enforcement was not involved.

☐ **Additional information attached.**

ITEMS MARKED BELOW FOLLOWED BY AN ASTERISK (*) SHOULD BE EXPLAINED IN THE NARRATIVE
